

CAPE BUFFALO CUTOUT

1. Cut around the shape.
2. On the head area, fold down on dotted lines.
3. Cut in on solid lines inside ears. Glue side of the ear underneath so dotted line meets solid line (see picture).
4. Glue tabs beside eyes to panel with horns, to form the head (see picture).
5. On the main body, fold along dotted lines, in the directions shown here.

6. On back side of paper glue leg panels together to strengthen them.
7. Glue long tab to opposite side, forming the backbone.
8. Glue tabs near tail to inside of back.
9. Use plenty of glue for the tabs on the chest. Fit them inside the main body.
10. On leg section, cut in on solid T-shaped lines. Fold loose flaps underneath body.
11. Bend the tail into place. Adjust the legs so your Cape buffalo stand firmly on the ground.
